

## Changes to Windsor Rx's 2009 Classic Formulary

Windsor Rx may add or remove drugs from our formulary during the year. If we remove drugs from our formulary, [or] add prior authorization, quantity limits and/or step therapy restrictions on a drug and/or move a drug to a higher cost-sharing tier, we will notify you of the change at least 60 days before the date that the change becomes effective. However, if the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug's manufacturer removes the drug from the market we will immediately remove the drug from our formulary. The table below outlines changes to our formulary that will impact you:
